5 - 5:20 pm

The Story of Stuff - From its extraction through sale, use and disposal, all the stuff in our lives affects communities at home and abroad, yet most of this is hidden from view. *The Story of Stuff* exposes the connections between environmental and social issues, and calls us to create a more sustainable and just world. It just may change the way you look at all the stuff in your life forever.

5:30 -- 6:30 pm

Energy on Trial - A film by Gary Jobson, *Energy on Trial* tackles a subject as vital to us as the air we breathe and the nourishment we require. But the way much of it is produced is terminally damaging our environment, and our health. The film presents the energy source groups one by one, evaluating each on the basis of cost, efficiency, environmental impact, and future potential.

6:30 - 7:30 pm - Remarks from a panel of distinguished experts:

James Woolsey - Former Director of Central Intelligence, former Under Secretary of the Navy, and a frequent speaker on US energy security

Gordon Bjorkman, PhD - Chief of Structural Mechanics, Nuclear Regulatory Commission

Dick D'Amato - Member of the US-China Economic and Security Review Commission and the Trade Deficit Review Commission, and Former Maryland Delegate, and wind energy expert

Reception following the panel discussion ends at 8:30 pm.
